

# DOUBLE FACE

# DOUBLE FACE Collection

DE · 50x70cm, printed on Glossy paper 80gr

This deco-easy collection of double-faced\* papers permits decorating glass objects without having to apply another sheet of paper to hide the white underside. By simply applying images on a transparent base, you can immediately see the same image duplicated on the reverse side, creating decorations even from inside the object in order to give a visual depth. A branch of roses applied to a transparent glass vase can create a vision of real roses immersed in water. These papers are also used to create abstract jewelry, unique pictures, frames, lamps and the porcelain effect with the Sospeso Trasparente ® technique created by Monica Allegro.

# Country selection

DE · 50x70cm, printed on Glossy paper 80gr

The Country selection is our company's response to the demand for images for those who do not want to venture into painting, although they appreciate the country-style themes. We have created an innovation with the double-faced collection: most of the subjects are depicted both from the front and behind, leveraging the double side printing, to offer the possibility of also working on glass. In addition, every single subject presented is printed at least twice to offer the creative decorator the possibility of having both the front and the back views if the paper is applied on a wood support.
