WATERSLIDE DECALS Collection

DEW · 29,7x41cm, printed on Decalcomania paper.

TRS · 29,7x42cm, printed on Decalcomania paper.

ENGLISH:

Waterslide decals can be transferred to any smooth surface for decorative purposes such as glass, metal, ceramic, candles, soap bars, picture frames, etc. This technique allows even those who are not very skilled at the decoupage technique to create a beautiful decorative effect.

The decals can be used also on those supports subject to wear such as plates, cups, ashtrays, as well as glass and pottery objects suitable for high-temperature cooking at home.

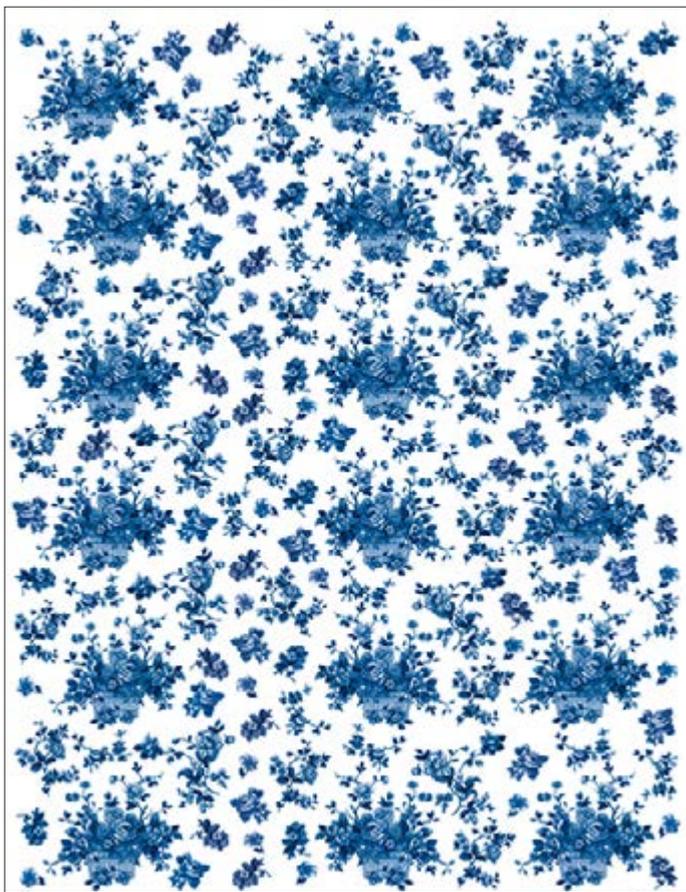

DEW 01 printed on Decalcomania paper

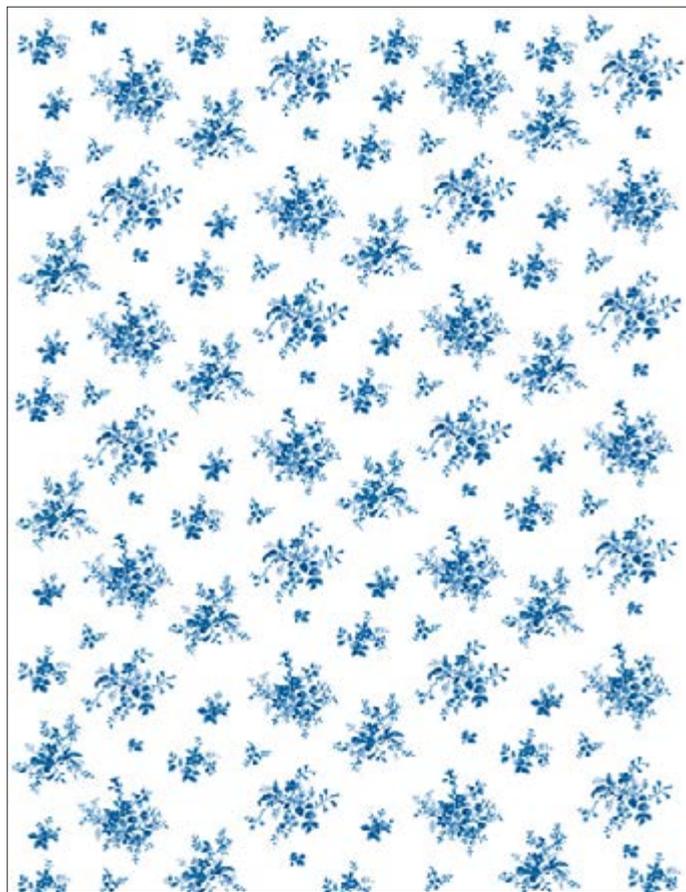

To grant a long-lasting life to your objects baking is recommended as per following instructions:

- 1.** Cut out the subject to be transferred, taking care not to cut the image.
- 2.** Soak the clipped image into cold water for one minute, slide it carefully on the object to be decorated, and use a microfibre cloth to press out gently the water and air bubbles.
- 3.** Pre-heat the oven to 180 ° and bake the object for one hour.
- 4.** Turn off the oven and let it cool inside before taking it out. It is recommended to wash it by hand and not in the dishwasher.

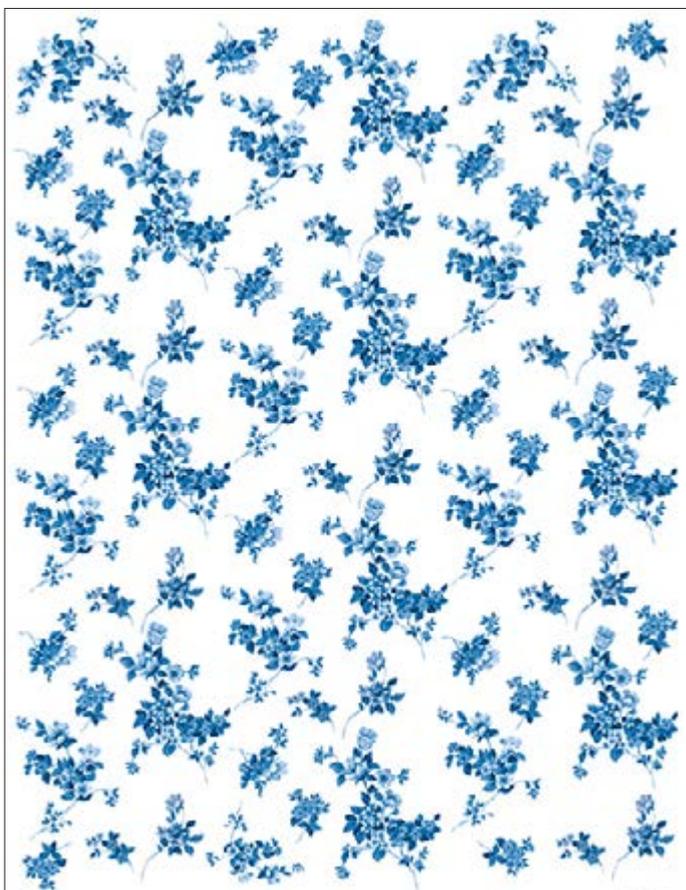

*To get a flawless result on porous surfaces such as paper, wood, and similar, apply first a layer of primer or color and last a finishing paint layer.
